---

Garrett,

When I read thru Mrs. Wisecup's comments that she asked me to read into today's agenda meeting, I noticed she referenced AGAIN the TOXIC IAQ of the Diablo office. So prior to the meeting I went into the overflow room, and noticed the SAME TWO ceiling tiles have water intrusion marks AGAIN.

I called her regarding this and she asked me to video tape the tiles.

March 29, 2017 Overflow room  
<https://youtu.be/liaDW8H474Y>

This water damage issue has been going on for YEARS!

Here are the actual links from prior videos.

January 9, 2013

So since this issue has been an ongoing issue, which all you DID was a 'patch' by removing tiles, WITHOUT addressing the SOURCE of the problem.

Not to IGNORE the actual water STREAMING thru the spigot years ago in the main room, whereby, on the video Alaina made the comment 'its doing it again'.

Also, your feeble attempt to CONTROL the problem in the main room, which either happens when it rained (that Alaina commented on), or when the thermometer was turned down, the leaks appeared thru the spigot also. Which a while back, when you put a sign on the thermometer not to adjust it, I was told it was BECAUSE at LOWER temp it starts to leak.

Years ago, I demanded to know why they were using either a fragranced air freshener or Lysol, I was told, that the overflow room had a MUSTY/UNCOMFORTABLE odor.

Well, of COURSE, as the VOC's from the mycotoxins were generating that perceived malodorous odor, spraying only covered it up, it did NOTHING to remediate the ongoing problem.

I speak with COMPLETE ASSURITY, as I am highly versed in IAQ and your Diablo office is a SICK

BUILDING.

Mrs. Wisecup had mentioned this numerous times in emails in prior years, I believe even when Jan Cohen was still the GC.

So I am putting you on notice, if this is NOT resolved PRIOR to the next agenda meeting, with PROOF that a REPORT, from a CERTIFIED mold tester provided, and proof that an independent remediating company provided, that this water intrusion has been addressed, I will contact USGB and file a complaint, that your office is NOT promoting one of the tenets of LEED Certification, aka HEALTHIER IAQ.

As your building is a Bronze Level LEED Certified. Which is the LOWEST level from LEED.

I CAN'T wait to hear that one of Diablo employees had been made ill, as I will make sure the NTEF provides support their claim for a Worker's Comp injury, including but NOT limited to the labs that test for this and doctors who address this type of poisoning, as you have been provided for at LEAST FOUR YEARS of this issue and intentionally have turned a concerned and mendacious deaf ear.

Time is ticking away.

As a side note, after the meeting I informed Ann that your calendar is NOT up to date.

It appears according to your NOTICE regarding Docket 17-02045, it stated that by 5pm today, comments for the Tesla Docket were due, but it is NOT reflected on your calendar. I gave her a screen shot as of yesterday that has failed to notice this deadline.

As you are VERY WELL aware, there is NOT a standard time for submissions, as some are due by noon, 2 or 5 pm. So why wasn't this docket on the calendar?

As I tried to access your calendar and all docket pages/links today to reconfirm as of today, that the calendar is still not current and they are not active, guess you are having website problems, isn't that annoying?? Gee, I hope you didn't get hacked.
